

Dear Friends,

Welcome to the keys to love and money! You all know I've spent twenty-five years appearing on TV, from Oprah to CNN, written four books on love, and lead workshops all over the world on love and money, and of course founded the International Love, Money and Seva Summit (Seva means selfless service). This year I'm going further and faster than ever before to create a fantastic new series of seminars on The Keys to Love and Money with a new secret weapon. Here we go!

These simple and powerful strategies will help you to increase your abundance and prosperity. I asked my brilliant seminar partner, the money master himself, Steve Fox (he's the secret weapon) to share with us some of his money secrets. I asked Steve because he has exhibited proven mastery in the area of financial stability and abundance for over thirty-five years. You're going to love his wisdom. If your car breaks down, who do you go to for help? Roof leaks, who do you call? Dental issue? Like everything else in life, love and money are a science. We work on love and money in tandem because they are so intertwined, as you are about to discover.

At the end of this lesson Steve and I have a special gift for you.

**The science of money is based on three master keys:**

- Insight
- Skill
- Action

**Here are some principles in each of the three master key areas.**

1. **INSIGHT:** Science has proven that there is a straight line between what we learned as children and what we create in our lives. If you aren't winning big in love and money, it's time to make some changes from the inside out. Remember what is outside is a symptom of what's on the inside, our feelings, thoughts and beliefs.

Ask yourself these questions: What did I learn about money from my family? This is not about blaming, just understanding that children are miniature recording devices. What was your mother's favorite saying about money? Your father's favorite saying about money? What was your family's way of teaching you money principles?

Based on the answers to these questions what choices have you made with your money? For example, my mother's favorite saying was, "money doesn't grow on trees" and she didn't teach me any money principles. Surprise! This has been an area of great challenge in my life, so I've put a lot of attention to learning for myself what my parents couldn't teach me. When we learn better we do better. Right?

2. **SKILL:** Here is one of Steve's great principles.

BE YOURSELF – What is easy, natural and fun for you is usually where your biggest talent lies, and therefore is the way you can make the most money. Also, when you are being your authentic self, people will naturally trust you, which is a key component of success in any arena.

3. **ACTION:** Giving and Receiving are two sides of the same coin. Therefore:

GIVE HUGELY AND FULL-HEARTEDLY – In every moment, be the person who makes a significant, extraordinary contribution – To everyone: your customers, your boss, your colleagues, your friends, your competitors, total strangers, etc. You will be recognized and remembered and will be the one for who doors open for. One of today's "total strangers" may very well end up as your biggest benefactor.

RECEIVE HUGELY AND FULL-HEARTEDLY – balance your "Huge Full-hearted Giving" with fully accepting and receiving the rewards for your contribution without any hesitation or reservation. Being fully receptive is actually a contribution. It allows others to contribute, which is a basic need everyone has. It also fulfills a fundamental relationship dynamic – "the law of fair exchange", which allows everyone to feel good, clean and complete about their transactions with you.

Do you want the experience and abundance of both love and money in your life? Are you ready to learn the secret science of love and money? Is 2011 the year for you to get on the fast track to greater mastery? Ready for our gift to you? Drum roll please!
